

Biatain[®] Ag - the best performing
anti-bacterial dressing on the market

Biatain® Ag

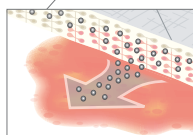

– superior absorption for infected wounds

Biatain® Ag is a soft and conformable silver foam dressing that is proven to help infected wounds heal faster^{1,2}. Major independent studies have proven that Biatain Ag is the only wound dressing that is effective on all bacteria commonly found in infected non-healing wounds.^{3,4}

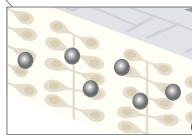

Optimal healing environment^{3,6}

Unique 3D polymer foam structure ensures superior absorption and high retention even under compression therapy.

Rapid killing of bacteria^{1,2,4}

Optimal concentration of silver ensures faster killing of bacteria such as MRSA, VRE, ESBL and Pseudomonas.

Designed to prevent wound infection¹⁻⁶

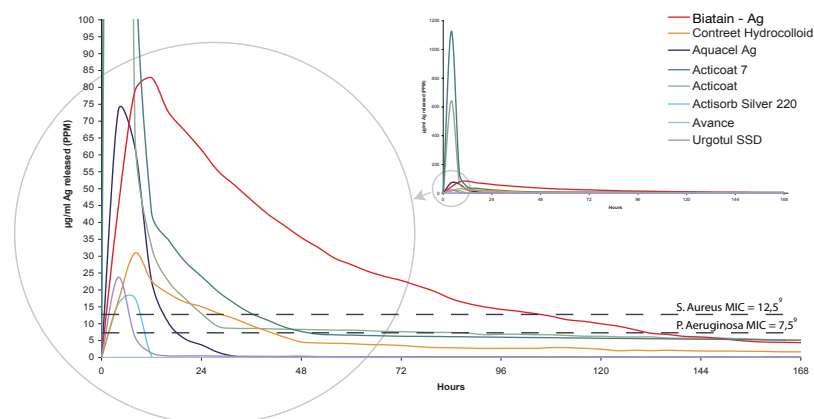

Our patented silver profile provides you with a sustained release of silver during the entire wear time (up to 7 days).

Indications

Biatain Ag can be used for a wide range of exuding wounds with delayed healing due to bacteria, or where there is a risk of infection, including leg ulcers, pressure ulcers, second-degree burns, donor sites, postoperative wounds and skin abrasions.

Biatain Ag Non-Adhesive can also be used for diabetic foot ulcers. Biatain Ag can be used in combination with compression therapy.

In vitro silver release profiles for various antimicrobial dressings
